

4 Courses

Relational database systems

Business intelligence and data warehousing

NoSQL systems

Designing data-intensive applications

22.09.2020

**DANISH RAZZAK SHAIKH**

has successfully completed the online, non-credit Specialization

## Database systems

This specialized program is aimed at computer people who want to enter the field of information systems and learn their different types of requirements, architectures, performance, techniques and tools so you can know when to use business intelligence, data mining, data science, databases, databases in memory or big data in order to have reliable, maintainable and scalable data intensive systems. Through 4 courses, you will cover [transactional relational databases, business intelligence and Data warehousing, NoSQL technologies, and reliable, scalable and maintainable data intensive applications that will prepare you for a specialized information system consultant or data scientist.

María del Pilar Ángeles,  
full time professor at the  
Department of  
Computer Engineering  
of  
the National  
Autonomous University  
of Mexico, Ph.D. in  
Computer Science by  
Heriot-Watt University.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
