DANISH RAZZAK SHAIKH

has successfully completed the online, non-credit Specialization

Alibaba Cloud Computing

In this specialization, users learned the design and capabilities of Alibaba Cloud's fundamental and most well-known Cloud products. After learning the theory behind each product, users went through demo courses that walked them through the steps in creating architectures for cloud solutions. Upon completion, users will be able to build solutions on Alibaba Cloud's infrastructure to help their studies or business launch into the future.
